Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent Number 4,639,088 to Sugino et al (hereinafter '088).

'088 discloses in the abstract and figure 2, a display device comprising an electro-optic medium (7) between a pair of substrates (1, 5) arranged in opposite relation with respect to each other by spacer means (6), one of the substrates being provided with coloring materials (filters 3) within areas separated from each other by said spacer means.

As to claim 3, the spacers form a two-part structure.

As to claim 4, example 2 discloses use of ceramics for the substrate (ie. Opaque).

As to claim 5, the filters are made with conductive materials.

As to claim 6, the device is sealed and filled with liquid crystal materials.

3. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by JP20000180841 (Applicant's disclosure of prior art; APA841).

APA841 discloses the invention as claimed including two opposing substrate layers (2, 3) with a spacer (4) and a color layer (5).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over '088 as applied to claims above.

'088 discloses the invention as claimed except for the disclosed materials. It is noted that '088 does not specifically limit the types of materials used.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the material combinations as claimed, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. United States Patent Application Publication 2004/0009303.
- b. United States Patent Number 4,802,743.
- c. United States Patent Number 6,480,253.
- d. United States Patent Application Publication 2004/0155857.
